IRON FOR PERMANENT FORTIFICATIONS.

Experiments at Fortress Monroe by the Engineer Department.

FORTRESS MONROE, September 21.---By 8:30 A. M. to-day the experiments with iron for permanent fortifications were commenced in the Rodman gun, which is a 15-inch gun, cast hollow, with a core of iron for the purpose of cooling. The gun which was fired to-day was loaded with 100 pounds of powder and a solid cast-iron shot weighing 440 pounds, and was fired with an elevation of 15 degrees. The charge, however, to the mammoth was found to be unsatisfactory. Three of the blocks at the end of the frame were shattered, started from their position, and bent broken.

The shot fired was first from the same gun, with a full load of 200 pounds of powder and a solid shot weighing 440 pounds, and the initial velocity of the shot was 1,100 feet per second. The gun was elevated at an angle of 15 degrees, and the shot struck the target at 2 P. M. The distance was 1,000 yards

"MY POLICY."

DISCOURSE BY REV. E. L. COLLINS.

The Threatened Coup d'Etat—The Archbishopric Fools of A. J.—The Constitution by Car Loads, and Flags without Number.

Opening the Discussion—Political Sermons—New Orleans and Memphis—A Scathing Review.

An able discourse on "The Policy of the President," was delivered last evening in the Church of the Messiah (First Universalist,) by the pastor, Rev. E. L. Collins. The subject was a fine one for a preacher selected for his text the words, "First policy, then politics," from the 17th verse of the 6th chapter of the Epistle of James. The following is the principal portion of his discourse:

The distinction between loyalty and disloyalty was clearly drawn in the days of the Apostle. Christianity was not then a political power. It was not even a political party. It was only a religious sect. Its loyalty was to the powers that be, whether they were the powers of Republic or Empire
